

Level 2 Foundation Certificate in HACCP

About the course

The foundation Certificate in HACCP is aimed at everyone employed in the food industry who need to have an understanding of HACCP. The course covers the basic principles of HACCP and the common terms used within the system, The course is run with an interactive theme and many practical situations are discussed during the day.

The course outline is

- Understand the principles and terminology
- Identification of different hazards
- Specification of Critical Control Points
- The corrective actions to be implemented, verification, importance of documentation & reviewing of the system.

Among those who would benefit from this training programme are:

- Managers
- Supervisors
- Team leaders
- Trainers.

Attendees should have a broad understanding of food hygiene safety issues in advance of attending this course.

It is therefore strongly recommended (but, not a requirement of attendance) that attendees have previously successfully completed the Level 2 Food Safety Course and have a good working knowledge of a food production process.

Intrinsic Training Solutions deliver this programme during a full day

- The training time to cover the required syllabus areas must be at least 9 hours,
- The programme is usually delivered on your organisations site but, can be delivered locally as you wish.
- Assessment is at the end of the course.
- Assessment is through a 20 question multiple choice test paper.
- At least 14 correct answers or 70% is required to pass the assessment
